The 2016 Blade range has been refined and improved to offer maximum efficiency, durability at the lightest possible weight.

## BLADE TECHNOLOGY

- Flex and strength are tuned into each blade size and shape through the utilization of Biaxial and Uni-Directional cloths.
- A blade with good flex allows one to paddle longer and harder without getting tired.
- New high density PVC core developed from aerospace technology.
- Super strong ABS rail insert along the entire edge of the blade to reduce damaging the blade.
- Controlled resin ratio on all blades, minimizing any excess weight without compromising the strength and flex of the blade.

### CARBON

- Custom woven Biaxial 60/60 degree Carbon cloth and a new high density PVC core absorbing less resin.
- Biaxial 45-degree fabric used to increase the durability and reduce risk of buckling.
- Retains strength while possessing incredibly good flex characteristics.
- Bolt has a shortened stringer to give more flex and recoil at the very tip of the blade.
- ABS rail insert along the entire edge of blade.

Available in blue for Enduro and red for Bolt.

### TIKI TECH

- High density PVC Core reduces resin uptake making the blade stronger and lighter than ever.
- UD Carbon stringer continues all the way from the neck to the blade, enhancing the reflex characteristics and strength.
- Full ABS rail and special scratchproof surface finish.
- All size Tiki Tech blades sold separately in Red, Blue, Green, and Pink graphics with matching ABS Edge.

### TUFSKIN

- Strong and extremely durable ABS foils based on the Enduro L and Enduro S blades.
- Perfect for whitewater paddling and schools due to extreme strength and high impact resistance.
- A great value due to strength and high quality shape.

## BLADE SHAPES

- Blade angle through the water and the blade's size dictate the power and efficiency of your stroke.
- All blades angled and foiled to minimize drag and maximize power transfer throughout the stroke.
- Tracking and catch of the blade is crucial in achieving maximum power transfer.

### ENDURO

#### ABS RAIL

ABS rail from neck to the entire edge of the blade.

- Well-balanced all round blade design with a medium dihedral providing great stability and good power.
- Low aspect design makes it easy to lift out of the water with each stroke and also great to lean on while wave riding.
- A preferred choice for Titouan Puyo who matches with an oval shaft for racing, and a favorite for Sean Poynter who uses a round shaft combination for the surf.

### BOLT

#### ABS RAIL

ABS rail from neck to the entire edge of the blade.

- Unique square outline and 10 degree angle makes it exceptionally direct.
- Double concave on the power face creates an effortless and forgiving catch.
- The blade aligns itself in the water for maximum tracking with power transfer in a forward motion.
- The choice of 2015 Euro Tour Champion and 2014 World Champion racer Connor Baxter and anyone looking for an efficient paddle.

## HANDLE TECHNOLOGIES

- New Push Handle shape with flattened neck to allow the paddler to push forward to transfer power, without needing to hold a tight grip.
- Perfectly angled front shape with the index finger indent provides a balanced grip improving tracking.
- Available in Carbon, Light weight Texture Plastic and EVA.

### CARBON

NEW

- Composite Carbon handle fitted with Oval, Round or Skinny Carbon shafts.
- Super light weight at just 35g (1.1 oz) and strong due to the carbon layup.
- Twill Carbon finish and brushed texture for enhanced grip.

### LIGHT WEIGHT

- Light weight, strong molded handle.
- Paired with our Hybrid Carbon Shafts.
- Lighter than many composite handles on the market at just 45g (1.4 oz).

### LONG HANDLE

- One piece, light weight solution to lengthen the paddle.
- Extra-long shaft for 30cm (12") of adjustment.
- The handle can be fixed using hot glue if adjustments are needed or by epoxy for a permanent fixed length.

# SHAFT TECHNOLOGIES AND SHAPES

## TWO TECHNOLOGIES

- All shafts produced using pre-impregnated fabrics.
- Minimal resin to fabric ratio.
- Maximum efficiency and strength in every shaft.

**FIXED LENGTH**  
 Adult 165 cm 65 inches  
 Kids 130 cm 51 inches

**FIXED LENGTH**  
 Adult 165 cm 65 inches  
 Kids 130 cm 51 inches

### CARBON

- 30 grams (10%) lighter than 2015 Premium Carbon, for longer and more efficient paddle sessions.
- Light weight 100% Carbon fiber pre-impregnated construction.

### HYBRID CARBON

- Looks like Carbon.
- 27 grams (10%) lighter and stronger than 2015 Premium.
- Economical and great combination when paired with Starboard's Enduro and Bolt Tiki Tech blades.

## SHAFT SHAPES

We have 3 different shaft shapes available to offer maximum comfort and grip for every riding style.

### OVAL

- Precise and controlled grip.
- Shaped to naturally fit in hand for the most direct tracking and alignment.
- No sharp angles as with many other oval shafts.
- Available in Oval 38/42 Fixed Carbon and Oval 40 Fixed Hybrid Carbon.

### ROUND

- Most light and lively versatile shaft.
- Preferred for all-round paddling and waves.
- Sean Poynter and Zane Schweitzer's choice for wave riding.
- All Round shafts are available in Carbon and Hybrid Carbon in multiple options: Fixed / 2pc adjustable / 3pc Adjustable

### SKINNY

- 3mm Reduced Diameter Shaft [RDS] for lighter riders who require a smaller grip.
- Suited for kids, women and racers who want a shaft that feels slight in the hand.
- Available in Carbon and Hybrid Carbon with the following options: Fixed / 2pc adjustable / Fixed Kids 2 pc adjustable kids.

## SHAFT STIFFNESS

- The stiffness is measured by applying 30kg in the center of the shaft, supported at 140cm distance to measure the deflection in mm.
- If the shaft bends, it shows a higher deflection resulting in more flex, compared to a stiffer shaft with low deflection.
- The 35mm has the lowest flex, 42mm has the highest flex.

- Stiffest shaft for elite riders and paddlers who prefer minimal flex.
- The 35 has the closest flex to the 2015 Premium Carbon shaft.
- Only available in Round and Oval Carbon. Only shaft sold for blade customization.
- A stiff shaft with controlled flex to maximize speed and power.
- Connor Baxter's preferred choice.
- Only available in Round and Oval Carbon.
- A balance in performance between stiffness and flex.
- Only available in Adjustable combinations.
- 40 Hybrid Carbon available in Fixed and Adjustable.
- More forgiving, suiting long distance, all-round paddlers and most riders under 75-80 kg.
- Available in Round and Oval fixed Carbon.
- Available in all Skinny and Kids, Carbon and Hybrid Carbon, Fixed and Adjustable.

## SHAFT TEXTURE

### CHOKE STROKE

- Connor Baxter's new signature Choke Stroke with square grooved texture enhances the grip at the top of the shaft for high cadence strokes and quicker transitions from side-to-side.
- The entire shaft has a Matt Tape Finish for prime control when dry and wet.
- All Fixed shafts in Carbon and Hybrid Carbon feature the new textured finish.

# FIXED SHAFT

# ADJUSTABLE SHAFT

Precise light and strong.

- All new Adjustable shafts feel incredibly light weight with controlled flex characteristics.
- The wide Tiki Clamp is designed for a quick and effortless release.
- The new inner register slot controls the alignment without twisting.

SHAFT REGISTER SYSTEM

- 2 piece adjustable shafts are great for paddlers looking for different paddle lengths or sharing the paddle with friends and family.

- 3 piece paddles connect using a secure spring pin system and come with an additional Tiki Clamp to reduce any play.
- When fully detached, measures only 85cm and easily fits inside the Magic bag.

\*Available with Enduro Carbon, Enduro Tiki Tech, Bolt Carbon, Bolt Tiki Tech, Tufskin and Paddle For Hope

Tufskin sold without inner register slot on shaft.

### TIKI CLAMP

The Tiki Clamp has been slightly enlarged, allowing for a quicker and easier release on the water. The bigger surface area increases the strength and provides greater leverage, requiring less pressure to open and close the clamp. At only 28g, the clamp remains lightweight, minimizing swing weight and energy consumption in every stroke.

# POLO

The SUP Polo Blade has been designed in collaboration with Wholly Paddle to offer optimum functional performance, combining a blade that perfectly clasps the SUP Polo ball, while still being able to paddle effectively at speed. The distinct large Concave shape and Steep Sidewalls in the face of the blade allow the paddler to scoop the ball out of the water at ease. This is helped with the unique Polo Pocket, measured exactly to hold the ball securely at all times, allowing the paddler to swing around when aiming without the ball falling out. The Throat of the blade is specifically angled so that the ball rolls into the Polo Pocket, maximizing the swing release.

SUP Polo Blades are available in either blue or red to have separate teams.

**POLO**

# ENDURO FLAT WATER / SURF

A well balanced blade design with a medium dihedral providing great stability and good power.

Available in five sizes tailored to different power needs, the Enduro is designed as a multipurpose paddle for waves, flat water and racing. The Enduro is our most popular blade range due to its versatility and light feel. Sean Poynter, Izzi Gomez and Zane Schweitzer's choice for wave riding.

Carbon enduro features blue graphics and a blue ABS edge while Tiki Tech blades come in blue, red, green, and pink graphic options with matching ABS edge.

## BOLT FLAT WATER / RACE

An exceptionally direct blade that has incredible tracking, control and forgiving catch.

With its unique narrow and flat profile, the Bolt feels exceptionally direct with its 10° angle. The double concave on the power face creates an effortless and forgiving catch, inspired from the complex concaves in our race boards that offer unmatched performance. The blade instinctively aligns itself in the water for maximum tracking, allowing one to transfer all their power in a forward motion. Its slender outline cuts through the water to offer the highest cadence stroke for sprinting, while the power transfer and response is direct. The Bolt is designed to push you to paddle faster with less effort and fatigue. A precise and effective paddle that is perfect for racing and used by advanced wave riders who likes to pivot turn with their paddles. The Bolt is Connor Baxter's the 2014 World Race Champions signature blade.

Carbon Bolt features red graphics and a red ABS edge while Tiki Tech blades come in blue, red, green, and pink graphic options with matching ABS edge.

# ENDURO TUFKIN FLAT WATER / SURF

The Tufskin paddle features a nicely-foiled strong ABS blade based on the Enduro L and Enduro S composite blades.

The Tufskin blade comes standard with the Hybrid Carbon shaft making it an exceptionally good value. A kids version with a smaller diameter shorter shaft, smaller handle and a smaller 475 cm<sup>2</sup> (74 in<sup>2</sup>) blade size is also available. The Enduro Tufskin is perfect for white water paddling due to its extreme strength and durability.

The Enduro Tufskin paddle is also available in 2 pc adjustable and 3 pc versions (85cm fully detached), best suited for schools and travelers.

# ALL ROUND

**PROVIDES ENOUGH GLIDE FOR FLAT-WATER CRUISING, GOOD STABILITY FOR CATCHING WAVES AND EXCITING PERFORMANCE ONCE UP AND RIDING.**

- **Target Rider:** First time paddlers up to 130kg
- **Dimensions:** Boards length from 10'5" for fast glide and speed to cruise and cover distance. Width is 30" to 36" providing stability
- **Key Features:** Wide nose and tail for stability. Bungee tie downs on Atlas and Atlas Extra, ¾ Eva Deck pad. AST Electric with extra fin boxes for windsurfing.

# 12'0" X 36"

## ATLAS EXTRA

*"An ultra-stable ride with good glide and fun downwind characteristics."*

- Maximum stability at 36" wide, suited to heavier or multiple riders up to 130kg.
- 12'0" is the longest all round length offering fast glide for cruising and entry into waves.
- Bungee inserts for storing gear.

**Bottom shape:** "Mono-concave to flat V"

- Race aft rocker for fast paddling and nose kick to deal with choppy water or downwinders.
- Mono concave offers speed and glide with the V tail for rail to rail turning.

**MAX RIDER WEIGHT**

130 kg

# 12'0" X 33"

## ATLAS

*"The entry level board for all aspects of the sport providing a stable platform for the heavy rider or multiple riders."*

- One of our best selling boards due to its versatility for many riders and conditions.
- The 33" width offers a stable platform for entry-level paddlers up to 115kg.
- 12'0" length is the longest in the all round range and has the fastest glide.

**Bottom shape:** *"Mono to double concave to V in the tail."*

- Easy rail to rail drive, speed and mid point turning.
- Smooth cutbacks when stepping back onto the tail.

\* Technology Featured: Starshot Red

\*Starshot and ASAP are provided with Black injection molded fins

# 11'2" X 30" BLEND

*"The ultimate blend for easy entry into surfing and flat water cruising."*

- 11'2" length combines glide and maneuverability.
- 30" width is stable for riders up to 95kg and increases tracking due to a straighter paddle technique.
- Great for flat-water cruising and long board style performance in the surf.

**Bottom shape:** "Mono-concave to double to V in the tail."

- Heavy mid section concave generates speed and rail-to-rail reactivity from the middle of the board.
- Tail V for responsive cutback turning.

**MAX RIDER WEIGHT**

95 kg

**DIMENSIONS**

\*Starshot and ASAP are provided with Black injection molded fins

# 10'5" X 30" DRIVE

*"Extremely versatile flat-water paddleboard and ideal entry into the waves."*

- 10'5" is the shortest all round shape, designed for greater maneuverability and reactivity on the wave.
- 30" width is stable for lighter riders up to 90kg wanting a board that does it all.
- Narrower width increases speed and tracking due to holding the paddle straighter to the board.

**Bottom shape:** *"Mono-concave to double to V"*

- Mono concave in the nose creates lift and directs water into mid section double concave for speed and acceleration.
- Rail-to-rail turning from mid point of the board.
- Tail V increases maneuverability for smooth and tight cutbacks.

**MAX RIDER WEIGHT**

90 kg

# SURF

## BIG BONE

EXTRA WIDE TO ACCOMMODATE HEAVIER RIDERS IN THE SURF AND BEGINNERS WANTING EXTRA STABILITY TO VENTURE INTO THE WAVES.

## WIDE POINT

ALL AT 32" WIDE, THE WIDE POINT RANGE COMBINES STABILITY WITH HIGH PERFORMANCE SURF SHAPES FOR MEDIUM TO HEAVIER RIDERS.

## SURF 30"

GOOD GLIDE FOR EASY ENTRY AND SPEED INTO WAVES, WHILE OFFERING A NARROWER WIDTH FOR GREATER MANEUVERABILITY FOR LIGHTER WEIGHT RIDERS.

• <b>Target Rider:</b>	Heavier riders up to 130kg	Riders up to 105kg	Riders up to 95kg
• <b>Dimensions:</b>	33" wide and above for maximum stability. 9'0" to 11'2" for maneuverability and stability.	All 32" wide for good stability. Length from 8'2" to 11'2"	All 30" wide for efficient paddling and greater maneuverability. All boards are under 10ft.
• <b>Key Features:</b>	Wide nose and tail for stability, ¾ Eva Deck pad. All AST Electric boards with extra fin boxes for windsurfing.	Thinner rails and more pointed outline for maximum speed and control. Sharp nose and tail for stability. ¾ Eva Deck pad for optimum grip	Wide nose and tail with thinner rails for stability and speed. ¾ Eva Deck pad

# BOARD OVERVIEW: SURF

High performance, yet stable shapes for dedicated wave riding. Sizes 10'0" and above also for cruising.

## BIG BONE 33"-36"

Extra wide to accommodate heavier riders in the surf and those wanting extra stability to venture into the waves.

## WIDE POINT 32"

All at 32" width, the Wide Point range combines stability with high performance surf shapes for medium to heavier riders.

## AVANTI

*"The family board for every "Body""*

- 11'2" length has fast glide for flat-water cruising and easy entry into waves.
- 36" width offers an incredibly stable board for heavier riders or multiple paddlers up to 130kg.
- The bottom shape performance defies the dimensions of such a big board.

**Bottom Shape:** *"Mono to Double concave to tail concave"*

- Nose concave feeding into a heavy midsection double concave and V, create lift for getting into the wave easily.
- Ability to generate speed with rail-to-rail transition from the middle of the board.
- Mono concave tail offers speed with curve on the rail for tighter turning.

\* Technology Featured: Wood

**MAX RIDER WEIGHT**

130 kg

**DIMENSIONS**

Length:	Width:	Thickness:

**SIMILAR BOARDS TO CONSIDER**

- 12'0"x36" Atlas Extra
- 11'2"x32" Wide Point

\*Blue Carbon and Wood are provided with Light Core fins

AST Electric features an extra set of Surf Finz boxes set forward near the rail for added tracking when windsurfing (extra fins not provided).

\*Starshot and ASAP are provided with Black injection molded fins

# 10'0" X 34" WHOPPER

*"The famous board that makes everything easy. Simply fun for the whole family."*

- 10'0" length maintains glide for cruising with effortless trim and dynamic turning abilities in the waves.
- Incredibly stable for riders up to 110kg due to its 34" width.
- One board that can be shared with all members of the family.

**Bottom Shape:** *"Mono to double concave to tail concave"*

- Mono concave offers lift feeding to the double concave for control with rail-to-rail turning.
- Tail concave accelerates the water flow towards the fins, while very slight V offers a cleaner release.
- Generous nose kick makes pearling close to impossible.

\* Technology Featured: Wood

\*Starshot and ASAP are provided with Black injection molded fins

# 9'5" X 33" WHOPPER

*"A "slighter" version of the legendary Whopper."*

- The shorter 9'5" Whopper is easier to turn and maneuver on the wave.
- 33" width gives stability and float for riders up to 100kg for all round fun.
- Shorter length makes it easy for all riders to carry and transport.

**Bottom Shape:** *"Mono to double concave to tail concave"*

- Mono concave gives lift feeding to the double concave for lift and control with rail-to-rail turning.
- Tail concave accelerates the water flow towards fin, while very slight V offers a cleaner release.
- Generous nose kick makes pearling close to impossible.

# 9'0" X 33" HERO

*"Super stable board that turns like you wouldn't believe."*

- Short length increases maneuverability for easier turning on the wave.
- 33" width provides stability to support a rider up to 95kg.
- Stable and reactive, save energy surfing instead of wasting it trying to balance in the surf.

**Bottom shape:** "Mono-concave to V"

- Mono-concave accelerates water flow, while V tail increases rail-to-rail turning.
- The Hero reacts instantly when on rail, accelerating out of turns.

# 11'2" X 32" WIDE POINT

*"With more glide comes more options."*

- Dynamic board giving the larger rider up to 115kg excellent stability and maneuverability in moderate surf.
- The longest in the Wide Point range offers extra glide for cruising and earlier entry on the wave.
- 32" width gives stability while retaining high reactivity in the surf.

**Bottom Shape:** *"Mono-concave to double concave to round V"*

- Heavy midsection V and double concave makes effortless rail-to-rail transitions down the line for generating speed, feeding into a tail concave for tight fast cutbacks.

# 10'5" X 32" WIDE POINT

*"Versatile all rounder for performance in any conditions."*

- 10'5" length offers glide on flatwater and fast entry into waves.
- Shorter length heightens maneuverability and tighter turning.
- 32" width aids with balance for riders up to 105kg.

**Bottom Shape:** *"Mono-concave to double concave to round V"*

- Heavy mid section V and double concave generate speed with a rail-to-rail sensation when standing in the middle of the board.
- Tail V rocker and outline help to create smooth tight arcs.
- Fine forward rails, mono-concave nose and ample nose kick provide an efficient smooth and safe entry into the wave.

\*Starshot is provided with Black injection molded fins

# 9'5" X 32" WIDE POINT

*"For larger riders requiring stability without sacrificing agility"*

- 9'5" shorter length handles bigger sized waves and offers tighter and faster turning.
- Pulled in nose for dealing with hollower sections.
- Easy access to fun and performance for a range of weights and conditions.

**Bottom Shape:** *"Continuous mono-concave"*

- Fine rails forward for smooth entry acceleration with mono concave bottom shape to V off the tail for lift, speed and agility.
- Thruster configuration and tail kick for smooth on rail carving and aggressive cutbacks.

# 8'10" X 32" WIDE POINT

*"Shorter board for the heavier rider."*

- Shorter length makes it easier to whip around for riders up to 95kg.
- Delivers floatation and stability with exceptional performance in a range of conditions.
- Also a stable platform for younger lighter riders to develop surf skills.

**Bottom Shape:** *"Continuous mono-concave"*

- Moderate volume rails, shortboard outline and progressive rocker combine for a super smooth ride with the ability for aggressive cutbacks.

\* Technology Featured: Blue Carbon

## AIRBORN WIDE POINT

*"Maximum performance in minimum conditions."*

- For heavier riders up to 95kg who want maximum shredding in smaller surf.
- Thin rails and profile (thickness) offer a stable yet sensitive and highly responsive ride.
- Ability to generate speed and project vertically off of the back foot.

**Bottom Shape:** *"Continuous mono-concave"*

- When the waves are a little gutless, drive and acceleration are provided by the mono concave bottom shape, combined with fish tail and square rails.
- Although a fast rocker, it's still able to fit in the pocket for tight carves with release coming from V in the tail for letting the fins go when desired.

# 8'2" X 32" WIDE POINT

*"Small board agility for the not so small bodies."*

- Shortest in the range with the highest surfing performance for riders up to 90kg.
- Finer rails forward provide sensitivity for cutbacks.
- Thicker blockier tail rail produces acceleration and drive in turns.

**Bottom Shape:** "Continuous mono-concave"

- Mono-concave gives lift and a flat rocker in the middle offers speed, whilst maintaining rail curve for tight pocket turning.

# 9'8" X 30" ELEMENT

## "The Ultimate all-rounder"

- A popular cruising board for lightweight riders with progression into the surf.
- Good glide for coastal and river cruising translates into catching waves easily.
- Windsurfing option on all Ast Electric models.

### Bottom Shape: "Mono to double concave to V in the tail"

- A heavy double concave V in the mid section for rapid acceleration and trim from the middle of the board.
- Relatively heavy V off the tail for excellent carving performance.

\* Technology Featured: AST Electric

### SIMILAR BOARDS TO CONSIDER

- 9'5"x30" Converse+
- 9'5"x29" Nut
- 8'6"x31.5" Hyper Nut

\*Blue Carbon is provided with Light Core fins

AST Electric features an extra set of Surf Finz boxes set forward near the rail for added tracking when windsurfing (extra fins not provided).

# 9'5" X 30" CONVERSE+

*"The happy blend between glide and turning ability"*

The "+" equates to a slightly longer length than the Converse, meaning improved glide and easier entry into a wave.

It's full-length concave aids this, giving lift and life to the board. A flatter central rocker adds speed, with rail curve for smooth/rapid turning.

The "+" caters to a huge audience of lighter and heavier paddlers alike, being able to enjoy its dimensions. Lighter females will find it a good all-round board while heavier riders will appreciate its abilities in the waves.

Maximum fun in less than perfect waves.

*"Continuous mono-concave"*

\* Technology Featured: AST Electric

**MAX RIDER WEIGHT**

AST Electric features an extra set of Surf Finz boxes set forward near the rail for added tracking when windsurfing (extra fins not provided).

# 9'0" X 30" CONVERSE

*"A stable short board for the heavier rider to make the most out of the trickiest conditions."*

- Ideal transition for someone heavier wanting a shorter board for more progressive riding.
- An option for a lighter person up to 85g looking for a good stable all rounder.
- Moderate length and width provide a very stable platform to accelerate your learning curve in the waves.

**Bottom Shape:** "Continuous mono-concave"

- Outline, rocker and fin configuration combine for excellent acceleration, drive and reactive turning capabilities.

# 8'5" X 30"

## POCKET ROCKET

*"The shorter stable option for maximum enjoyment in trickier conditions."*

- Stable short board with strong performance credentials for riders up to 85kg.
- A popular progressive shape before advancing to the Pro Range.
- Wide nose for nose riding and dropping into waves early.

**Bottom Shape:** *"Continuous mono-concave"*

- Fast and agile due to mono-concave bottom shape and stable with moderate rails and fuller outline, it helps the heavier rider achieve maximum shred-ability without using too much energy standing up in choppy conditions.

\* Technology Featured: AST Electric

# PRO PERFORMANCE

## PRO

*HIGH PERFORMANCE SURF PRO SHAPES FOR MAXIMUM MANEUVERABILITY, SPEED AND CONTROL FOR HIGHER SKILLED RIDERS.*

- 
- **Target Rider:** Intermediate to high skilled riders up to 95kg.

---

  - **Construction** Available only in Carbon for increased performance

---

  - **Dimensions:** 24" up to 29" Wide offering more maneuverability and speed. All under 9ft.

---

  - **Key Features:** Narrow outline with thinner rails for rail-to-rail transitions and generating more speed. Pointed nose and squared tail. Tail Kicker Pad to push turns.

---

  - **Fins** Supplied with new FCS 2 fin boxes. Quad and thruster set up supplied with Light Core Fins.

---

  - **Conditions** Larger clean conditions yet can handle smaller waves.

---

**SEAN POYNTER**

Photographer: John Carter / Location: Maui

# BOARD OVERVIEW: PRO-PERFORMANCE

High performance surf Pro shapes for maximum maneuverability, speed and control for higher skilled riders.

## FCS II BOX

LATEST IN DETACHABLE FIN SYSTEM TECHNOLOGY AND PERFORMANCE.  
\* Only available for Blue Carbon pro model side fins.

■ SPEED

# 9'0" X 29" PRO

*"For the larger PRO in any conditions"*

- The longest in the Pro range offering speed in all size waves for riders up to 95kg.
- Redistributed volume from the rails to the standing area maintaining stability with increased speed and reactivity.
- Tight pocket turning and vertical lip attacks are enhanced even further to handle all wave conditions.

**Bottom shape:** "Continuous mono-concave"

- Mono-concave creates a flat rocker in the middle enhancing the curve on the rail for tight turning.

\* Technology Featured: Blue Carbon

\*Blue Carbon comes standard with Quad and Thruster fin boxes. Thruster Light Core fins are supplied based on team rider performance feedback.

# 8'5" X 29" PRO

*"The broad spectrum Pro for any conditions"*

- The most popular Pro board in the range for its unquestionable versatility to handle all size surf.
- Suited to skilled riders up to 90kg who desire speed and tight turning to rip.
- New tail pad for added grip to push bigger turns and thinner rails for increased reactivity.

**Bottom shape:** *"Mono-concave to V off of the tail."*

- Mono concave gives speed down the line, while the V tail makes turning instant on the tail.
- Drive and speed matched with tight cutbacks and vertical projection, all achieved with silky smoothness in the lines it draws.

\* Technology Featured: Blue Carbon

**MAX RIDER WEIGHT**

\*Blue Carbon comes standard with Quad and Thruster fin boxes. Thruster Light Core fins are supplied based on team rider performance feedback.

# 8'0" X 29" PRO

*"Stand with ease on an 8ft board"*

- 8ft has become the "go to" length for tight pocket turning amongst more experienced riders.
- 29" is suited for riders up to 85kg who like the 8'0" length but demand the extra stability.
- Holds well off the bottom in larger surf and generates speed in smaller waves for tight cutbacks.

**Bottom shape:** *"Continuous mono-concave to V off of the tail."*

- Mono concave gives speed down the line, while the V tail makes turning instant on the tail.

\*Blue Carbon comes standard with Quad and Thruster fin boxes. Thruster Light Core fins are supplied based on team rider performance feedback.

# 8'0" X 28" PRO

*"Ultimate all round rip stick for 65 to 80kg riders"*

- Super smooth and responsive, the slightest toe pressure will initiate a rail to project you down the line at speed.
- Short length combined with narrower width increases the speed and reactivity in every turn.

**Bottom Shape:** *"Forward V to tail concave."*

- A unique forward V to tail concave engages the forward rail, whilst accelerating the water through the tail due to the flatter rocker in the middle of the board.
- The rail curve in the back half of the board makes for searing cutbacks, with the ability to hold or release depending on how the back foot is pressured.

7'2"x28" Hyper Nut

\*Blue Carbon comes standard with Quad and Thruster fin boxes. Thruster Light Core fins are supplied based on team rider performance feedback.

# 7'7" X 27"

## PRO

*"For the 65 to 75kg rider, the 7'7" is the perfect blend of float and rip-ability."*

- Ultra responsive rails maintain enough volume for a comfortable balance without sacrificing sensitivity.
- The latest of drops can be survived, driven into barrels or carved into tight pockets.
- Small or larger surf you'll find the 7'7" capable of dealing with the situation.

**Bottom Shape:** *"Continuous mono-concave"*

- Mono-concave hull is fast down the center line and curvy on the rail, providing fast tight gouges and ability to re-direct vertically.
- Outline shape is finely tuned to match rocker and fin configurations.

# 7'1" X 24" PRO

*"The InZane is everything you need to bump up your Stand Up Paddle Surfing game!"*

- The shortest Pro in the range offering inZane turning from its short length for riders up to 60kg.
- Updated thinner rails, narrower squashed tail, updated bottom shape and upgraded fin positions all contribute to increasing the performance dramatically.
- Volume has been distributed from the nose and tail, adding more in the standing area to improve the paddling experience, without affecting the surfing performance.

**7'4" and 7'1" Bottom Shape:** "Single concave to slight V Tail"

- A single concave has been positioned back as far as the side fins for faster acceleration and speed.
- The previous V tail has been transformed to a Double Concave V to accelerate the water through the fins.

*The 2016 7'1" has a new and improved shape designed to carry speed, power and flow. With a rocker and rail-line design that allows for consistent speed, powerful driving turns, and controlled high performance maneuvers, this board is exactly what you need to take out the competition or surf InZane when in the water!*

- 9'5" x 32" Wide Point
- 9'8" x 30" Element

\*Blue Carbon and Wood are provided with Light Core fins

AST Electric features an extra set of Surf Finz boxes set forward near the rail for added tracking when windsurfing (extra fins not provided).

\*Starshot is provided with Black injection molded fins

# 8'0" X 31.5" HYPER NUT

*"All box's ticked for the bigger rider"*

- Wide nose and tail combined with 31.5" width makes it an extremely stable board for its relatively short length of 8'0".
- Defies its size to feel like a much bigger board suited to riders of up to 100kg.
- The amazing stability still retains rapid acceleration and speed, super tight turning radius for carving, vertical projection and general feeling of life in the board.

**Bottom shape:** "Mono-concave feeding through to channel tail"

\* Technology Featured: Blue Carbon

**NEW**

**MAX RIDER WEIGHT**

100 kg

**DIMENSIONS**

Length:	Width:	Thickness:
8'0"	31.5"	4.0"
243.8 cm	80.0 cm	10.2 cm
Tail Width:	Volume:

# 7'8" X 30" HYPER NUT

*"Ultimate stability and performance with added length"*

- The 7'8" is suited to riders of up to 95kg who want stability and glide with exceptional drive, acceleration and reactivity.
- It's lively performance from its short length makes it a highly popular size that can be thrown into most conditions.
- High maneuverability matched with comfortable stability.

**Bottom shape:** *"Mono-concave feeding through to channel tail"*

**NEW**

**MAX RIDER WEIGHT**

95 kg

**DIMENSIONS**

- 8 Side fins: 4.5" Light Core

**AVAILABLE TECHNOLOGIES | PRODUCT CODES**

Blue Carbon 2026160201001

**SIMILAR BOARDS TO CONSIDER**

- 11'2"x30" Blend
- 9'5"x29" Nut

\* Technology Featured: Blue Carbon

\*Blue Carbon is provided with Light Core fins

# 9'5" X 29" NUT

*"For the longboarder who wants to rip like never before."*

- 9'5" glide and longboard style with short board performance from 8'5" Pro tail shape.
- Small and gutless to large powerful waves, it has a massive wave riding range.
- The Nut outline accelerates water as you apply rail pressure, so when you utilize the mid section V, you get incredible sensitivity, drive and speed from the subtlest of movements.

**Bottom shape:** "Single concave to mid V to tail concave "

- Single concave gives lift for dropping in, smooth rail-to-rail transitions from the mid section V, moving back to drive and acceleration out of turns from the tail concave.

*I was out on the Nut 9'5" again today. The more I ride this board the more I love it. I'm starting to wonder why I even take another shorter board along with me.*

*When ever I am on the nut I am having the best time ever, most times when I am riding another board I wish I was on the nut.*

*I know it is more macho to ride smaller boards, but I am loving the longer 9'5" length. The more shorter boards I sell, it just means more waves for me.*

*~Steven Roan (Hi Tech, Maui)*

\* Technology Featured: Blue Carbon

# RACE

## ALL STAR

*THE ALL STAR PROVIDES AMAZING GLIDE WHILE MAINTAINING STABILITY IN ALL CONDITIONS AND CONTROL TO SURF IN BREAKING WAVES DURING BEACH RACING.*

• <b>Target Rider:</b>	Suited to all riders of up to 115kg.
• <b>Construction</b>	Lightest Carbon Sandwich Technology and Hybrid Carbon Technology.
• <b>Dimensions:</b>	24" wide for elite paddlers up to 28" for heavier riders and beginners. 12'6" length offering greater maneuverability and 14'0" for longer glide.
• <b>Key Features:</b>	Tri-concave bottom is optimized for ultimate speed and control. Slight tray with recessed deck pad for greater grip and stability. Straight and slender outline for optimum glide, control and stability. Channel bottom directing water flow and sharp rail edges for extra control in surf.
• <b>Fins</b>	Race Ultra Light Core center fin supplied.
• <b>Conditions</b>	Flat-water, choppy, downwinders and surf.

**CONNOR BAXTER**

Photographer: John Carter / Location: Maui

**ZANE SCHWEITZER**

## ACE

**THE ACE SETS A NEW STANDARD IN CHOPPY WATER PERFORMANCE.**

Medium to higher skilled riders up to 95kg.

Lightest Carbon Sandwich Technology.

12'6"x24" for greater maneuverability when buoy turning up to the faster 14'0"x23.5" for longer glide.

NACA profile outline with narrow tail for efficient release of water. High vertical rails create a deep tray for added stability. Flatter rocker for increased speed and ease connecting and riding bumps.

Race Ultra Light Core center fin supplied.

Open ocean and choppy waters/ upwind and downwind conditions.

## SPRINT

**THE FASTEST FLAT-WATER RACE BOARD FOR MAXIMUM SPEED AND EFFICIENCY, AIMED AT BOTH SPRINTS AND LONG DISTANCE RACES.**

Higher skilled and lighter weight riders up to 90kg.

Lightest Carbon Sandwich Technology.

12'6"x25" for greater maneuverability and 14'0"x 23" for longer glide.

Narrow outline, flat profile and foiled nose for optimum glide and speed. Complex concave bottom combined with flat rocker for linear glide. Dug out inner deck rail offering lower center of gravity for maximum stability. W-shape tail funnels the water for efficient release.

Race 24 Light Core center fin supplied.

Flat water to light chop.

Efficiency	9	8	10
Upwind	9	10	8
Surf	10	7	6
Downwind	9	10	6
Maneuverability	10	7	8

# CARBON SANDWICH

*Lightest weight, efficient flex and extra strength.*

## Features include:

- Super light weight biaxial carbon is laminated over the entire hull for the lightest weight, best strength ratio and most efficient flex. The mid-section of the board has stiffer UD Carbon side stringers to maintain the rocker in that critical area, thus optimizing glide.
- Thin high density PVC is used on the entire board minimizing resin uptake and maximizing strength. 0.6mm thick wood reinforcements are localized right below the standing platform to further enhance the longevity of the extra high density PVC sheet on the tray.
- This is the lightest and strongest race board construction we have ever offered.

# HYBRID CARBON

*This light weight hybrid layup, offers a good weight at great Strength*

- The full wrap of biaxial glass fiber covered by military grade plain weave gives great impact resistance for its weight and also provide a good Flex Pattern.
- The unidirectional carbon rail bands enhance this construction by making it longitudinally stronger and providing faster recoil.
- The standing area is reinforced with 2 wide strips of 0.6mm thick Australian pine to prevent heel marks over time.
- The Hybrid Carbon technology combines performance and great value.

# BOARD OVERVIEW: SURF / ALL WATER

The All Star provides amazing glide while maintaining stability and control to surf in breaking waves during beach racing.

FIN SET UP  
PERFORMANCE

# 14'0" AND 12'6" ALL STAR

*"The Racing Revolution".*

- The most versatile and popular race board from elite to beginner riders that can perform and win in all conditions.
- New design combines the All Star rail stability with the speed from the triple concave bottom shape of the 2015 Race, making it a winner on flat water.
- Added nose volume and refined overall volume distribution made the hull easy and sensationally fast downwind.
- The bottom shape offers speed from the center channel, stability from the side planes and control from the sharp rail edge for surfing and downwind.
- Like most creatures in the ocean, Starboards race boards have noticeable flex, thus utilizing the energy generated from the body moving up and down during paddle strokes.
- 25 different prototypes led us to fine tune and push limits to produce a revolutionary design far superior to anything we have presented before.
- Mat Rauzier and Svein Rasmussen led the development with support from Titouan Puyo, Bart De Zwart, Zane Schweitzer, Beau O'Brian and Connor Baxter.

## STRAIGHT AND SLENDER OUTLINE

*For optimum glide, control and stability.*

## DOWNWIND ORIENTED PROFILE

*Increased sensitivity for catching bumps.*

*Foiled Nose with well distributed volume to prevent nose diving.*

## TRIPLE CONCAVE BOTTOM

*The Tri-concave bottom is optimized for ultimate speed and control.*

## HARD CHINE TAIL BOTTOM

*Double release edge to direct the water flow and extra control in surf.*

## FLAT PROFILE

- Rail Tuck = Control On Wave
- Center Channel Out Line Creating Hard Chine = Trim Control In Down Wind
- Outer Concave = Control Stability
- Center Stringer = Concave Bottom Speed & Lift

## SLIGHT TRAY

*For more stability in wave.*

# 14'0" AND 12'6" ACE

*"The Ultimate choppy water champion."*

- Designed for slightly more advanced riders paddling in choppy and open ocean conditions.
- Curved rocker line for acceleration and entry onto bumps, connecting between waves and speed upwind.
- Cockpit standing area has been extended for added sensitivity to trim up and down the board to stay forever-catching bumps.
- High vertical sidewalls provide pop in chop and lowers the center of gravity for increased stability for the rider to exert maximum power with every stroke. Also restricts water entering the tray.
- Widened inside the tray at the tail for more room placing your feet back for improved stability and buoyancy when buoy turning.
- Added volume in the tail forces the tail to pop up immediately once submerged, minimizing drag.
- NACA profile outline with its narrow tail provides an incredibly efficient release of water.
- For extra stability in chop and effective support for buoy turning, exclusive foam wingers that fix onto the tail are available aftermarket.

# 14'0" AND 12'6" SPRINT

*"Fastest board on the water".*

- Fastest flat-water race board with simply the highest winning results in 2015.
- Versatile in both flat-water and light ocean chop. The center stringer tail curve and the rail stringer nose curve offer trim control, while the flat profile maximizes speed on flat-water.
- Flat profile and extended waterline performs with a linear glide, distributing the weight throughout the entire board, reducing any pitching or bouncing effect. The glide gives a hovering sensation on the water instead of ploughing through it.
- The channel, W shape tail and combination of hard and soft rail edges are designed using the Bernouli principle to direct and funnel the flow of water from nose to tail, maximizing acceleration and minimizing drag.
- Stability is controlled through the dug out inner deck rail shape, which allows the rider to hold a wider stance with a lower center of gravity, increasing reactivity to the smallest chop.

## SPEED OUTLINE

## FOILED NOSE PROFILE

Foiled nose creates a dynamic lift when nose is submergent on a wave.

**LIFT**  
Due to depressure

## ERGONOMIC TRAY

Deep tray for low center of gravity and stability. Ergonomic dug out inner rails for increased foot space and comfort

## HYDRO-DYNAMICALLY OPTIMIZED BOTTOM

# 17'4" X 27" ACE GT (UNLIMITED)

*"If you like catching bumps then the Ace GT is the answer."*

- Catches bumps like nothing else and connects one wave to another like a dream.
- Stable, enjoyable and effortless to paddle with its long length for very fast ground speed designed for intense downwinders and longer distance races.
- Iconic Ace design with distributed volume in the nose and a slender tail stops the nose from diving both upwind and downwind.

**DIMENSIONS**

Length:	Width:	Thickness:	Tail Width:

# 17'6" X 23" SPRINT (UNLIMITED)

*"Ultimate speed machine".*

- Longest race board in the range and simply the fastest board we have ever created.
- Designed as a flat water board with a Race 24 fin, this board does extremely well in light chop when equipped with an Ocean Fin Race 45, creating high momentum and transversal stability.
- Available in triaxial Carbon technology, exclusively used on the Unlimited, allowing a board of its size to weigh 11kg to stay stiff in flat water for best energy transfer, yet allowing a high recoil flex in ocean conditions.

**DIMENSIONS**

Length:	Width:	Thickness:	Tail Width:

# EXPLORING

**EXPLORE WITH FAST AND STABLE BOARDS. THE TOURING LINE IS A NEW DIMENSION FOR PADDLERS WANTING THE MOST OUT OF THEIR JOURNEY.**

- **Target rider:** Stable for all paddlers of up to 140kg with added volume to carry gear.
- **Construction:** Available in most technologies; Carbon, Wood, Electric and Starshot.
- **Dimensions:** From smallest 9'6" x 29.5" Pocket Touring up to 14'0" x 30" Elite Touring, as well as the larger 33" Fishing models.
- **Key Features:** Racing shape design for speed, stability and great tracking. Slender nose and narrow outline for fast and smooth glide. Bungee tie downs to carry gear and FCS inserts for lights and other accessories. Wide W-shape tail funnels the water for an efficient release.
- **Fins:** Dol-fin22" center fin on most models, Director fin for the smaller Pocket Touring.

# 14'0" X 30" EXPEDITION

*"The board for one or multiple day adventures and expeditions."*

After all the crossings and expeditions all over the world, Bart de Zwart had a clear idea of the perfect expedition board.

- Fast yet stable with enough volume to carry gear and supplies.
- Multi-functional: ready for a day trip with the family or a 7-day solo adventure.
- An inside compartment is used to stow gear, water or food and many options to tie down even more on deck. Plugs for towing, leashes GPS and even a deck track for windsurfing.
- Extra side fin options for windsurfing and a front rudder help to stay on course even in windy conditions.

**Bottom shape:** "Round V double concave midsection to deep V concave tail"

- With the race bottom shape and slightly higher nose, this board is designed to go anywhere from flat water, to rivers to open ocean.

**MAX RIDER WEIGHT**

140 kg

# 14'0" X 30" ELITE TOURING

*“Longer is always faster and this 14'0" x 30" Elite Touring maximizes every inch.”*

- For riders up to 120kg who want the fastest possible speed out of an easy-to-ride board.
- The 14'0" length and lean outline increases glide, covering distance quickly with minimal effort.
- Bungee tie down nose and tail to access gear without sinking or becoming unstable.

**Bottom shape:** *“Round V double concave midsection to deep V concave tail”*

- Streamline nose and tail give speed, while keeping a wide standing area for increased stability and comfort to conserve energy.

## ELITE TOURING

*"Extra fast, real stable and great tracking."*

- Shorter length is more maneuverable on the water, while maintaining speed, tracking and stability. Also lighter and more manageable to transport for riders up to 90kg.
- Equipped with two bungee tie downs to carry extra gear and four FCS inserts for installing lights or GPS.
- The aft fin box supports great tracking, reducing the amount of times you have to switch sides when paddling.

**Bottom shape:** *"Round V double concave midsection to deep V concave tail"*

- The slender nose pierces through small chop while volume distribution in the rails and concave bottom shape provides the buoyancy for fast glide and stability.

**MAX RIDER WEIGHT**

90 kg

# 10'6" X 29.5" 9'6" X 29.5" POCKET TOURING

*"Flat-water expeditions get even easier with this hyper-compact yet incredibly fast design."*

- A fast, stable yet maneuverable board with the option to carry supplies for riders up to 80kg.
- Unique oversized Director Fin and swept back Fin Box provide exceptional tracking
- Compact shape with wide tail makes it easy to turn and comfortable to carry, store and transport.

**Bottom shape:** "Round V double concave midsection to deep V concave tail"

- Volume in front of the standing area makes for speed and good paddling stability.

*"The Pocket Touring is my go-to board for every one of my SUP mini-adventures. I like to load it with a few waterproof bags, an inflatable tent, some camping food and leave the noise of the city for a couple days alone in the wilderness. This is where I find myself free."*

*~ Franz Orsi*

*"Joyce and I got to try out the new 10'6" Pocket Touring boards last weekend and WOW... I think Starboard has another winner here. They are: Light, quick turning, and they accelerate with each stroke! ... and Joyce was able to easily pull it off the top of the car, also a bonus! "*

*~Clay Feeter, Publisher, Standup Journal*

*"The Paddle For Hope is a celebration of life. Our goal is to give back some strength and confidence to women who have been diagnosed with breast cancer, and give them the chance to start healing through paddleboarding."*  
*- Karin Horen, Paddle For Hope Ambassador.*

After removing from breast cancer at the age of 26, SUP fitness instructor and mother-of-three, Karin Horen made a promise to help others on the same journey, and in 2011, together with volunteers and Starboard NZ, Karin initiated the annual Starboard Paddle For Hope charity event; a fun SUP festival to raise money awareness for breast cancer rehabilitation.

In 2014 Karin had breast cancer for the second. She underwent a double mastectomy, chemo and radiotherapy, and reconstructive surgery, all while using paddle-boarding to help her recover.

Starboard will donate 50 Euros from every Paddle For Hope board sold to help people rehabilitate from the effects of cancer through the PaddleOn SUP Rehabilitation Program, facilitated by Pinc and Steel Cancer Rehabilitation Trust <[www.pincandsteel.com](http://www.pincandsteel.com)>

The board features artwork from The Painted Warrior, by NZ artist Nikki Sorich. In the original painting she sits gracefully in a small paper boat on which is written by her child -"love, hope, courage, faith and family"- words chosen to represent a woman's journey with breast cancer.

**MAX RIDER WEIGHT**

\* Technology Featured: AST Electric

*AST Electric* features an extra set of Surf Finz boxes set forward near the rail for added tracking when windsurfing (extra fins not provided).

# 12'10" X 33" STEALTH

*"Silent, smooth and stable"*

- Long streamline hull with pointed nose slices through the water, creating a smooth and silent glide without disturbing the fish.
- 33" wide hull with slight tray and ultra wide tail offers a stable platform to comfortably move and react to the first bite.
- Paddle freely using Scotty Mount inserts for attaching rod holders, fish finders or a fishing rack for stowing gear. Store extra gear with bungees attached on the nose and tail.
- Aftermarket accessories include the Cooler Box, a clean storage solution and also the perfect seat while waiting for a bite. Use the Gear Rack to store and easily access extra tackle, keeping it high off the deck and dry.

**Bottom shape:** "Round bottom"

- Inspired by Jim Drake's K15 hull for a fast and smooth glide.

**SIMILAR BOARDS TO CONSIDER**

- 12'0"x33" Sportsman

# 12'0" X 33" SPORTSMAN

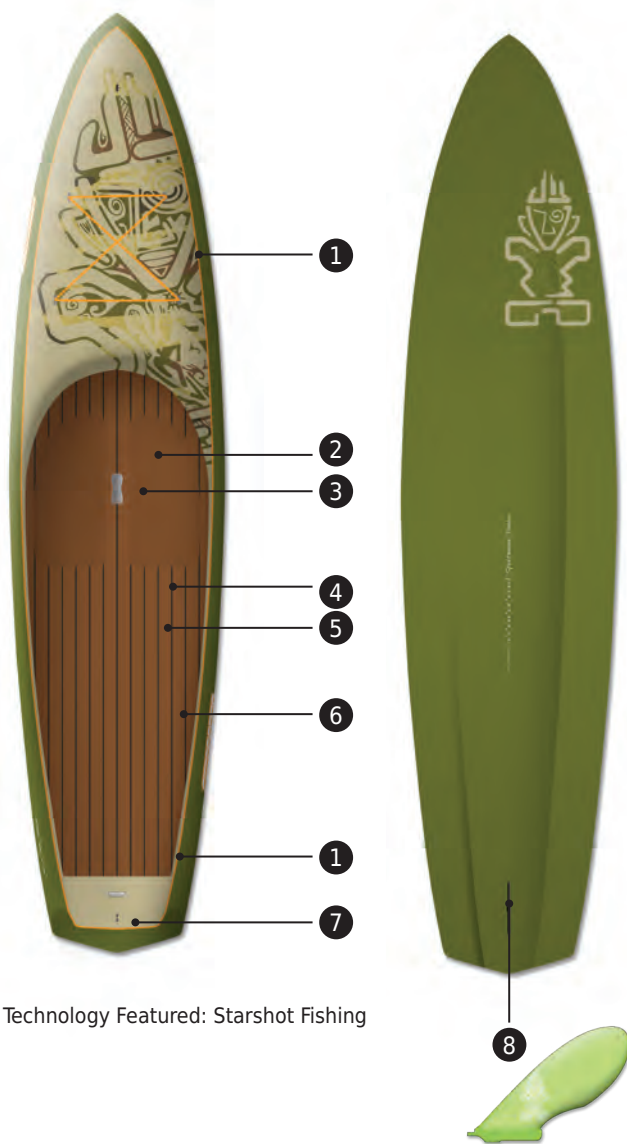

*"The perfect match for that big catch"*

- 12'0" length covers distance and maintains good ground speed for trawling and paddling quickly in open ocean conditions.
- Ultra wide tail increases overall stability to move and rotate freely when reeling in a big fish.
- Volume in the nose stops the board diving in chop and keeps it stable enough to power through rough conditions.
- Space on the deck to hold a cooler box with enough room to move around.
- Bungee tie downs help carry gear as well as multiple FCS inserts for different accessories.
- Scotty Mounts in front of the standing area are ideal for aftermarket GPS and other Scotty accessories, while mounts behind can be used for attaching rod holders or a fishing rack.

**Bottom shape:** "V to triple concave to single concave."

- Sharp V creates a very silent entry on the water making no noise and wake.
- Round rail creates good displacement and glide and center channel concave for lift to reduce the wet area.

# 9'5" X 36"

## SUP POLO

*"Combining the fun of team sports with SUP"*

SUP Polo is the new sport offered by Starboard in collaboration with "Wholypaddle", linking a water sport with a team game.

- 9'5" is short enough to have great control in the pool, but long enough to accelerate and respond quickly.
- 36" wide offers plenty of stability to focus on the game without thinking too much on your balance.
- Twin Tip design gives maximum maneuverability to move forward and reverse without having to make risky snap turns.

Fins:

- 2 SUP Polo fins at nose and tail give enough tracking in both directions, while still maintaining great control of the board. A 6<sup>3/4</sup>" center fin provides additional tracking, making it a more versatile board for when you're not playing SUP Polo.

**MAX RIDER WEIGHT**

# 11'6" X 30" PADDLE FOR HOPE

*"The Starboard Paddle For Hope 11'6" x 30" Touring, inspired by Karin Horen"*

- All profit from sales of this board are donated to Pinc and Steel to develop PaddleOn, a SUP rehabilitation program for men and women living with cancer.
- 11'6" length offers a fast and efficient outline shape for superior glide and stability.
- Featuring 3/4 EVA deckpad, paddle holder and bungee tie downs for storage.

*"The Paddle For Hope is a celebration of life. Our goal is to give back some strength and confidence to people who have been diagnosed with cancer, and give them the chance to start healing through paddleboarding." - Karin Horen, Paddle For Hope Ambassador.*

# 12'0" X 34" SPORTSMAN

*"The world's ultimate mobile fishing craft."*

- 12'0" enables you to cover distance with ease and at speed.
- The 34" width and ultra wide tail provide a stable platform to move around with confidence, while allowing efficient paddling and turning.
- Bungee tie downs on the nose and tail for storing tackle and supplies in position.
- A 150cm Fish Tape printed on the deck pad for quick access to measure the catch.
- Deluxe technology with the dual stringer provides a stiff platform to reel in the big fish whilst keeping confidence in stability.
- Scotty mounts in front and behind the standing area can attach fish finders, rod holders, fish rack and other Scotty accessories. FCS insert on the nose is ideal for navigation lights and a camera.

# INFLATABLE

Starboard has joined forces with whitewater pioneer Dan Gavere to create two new river running models: 8'6" and 11'0" to accompany the 9'6". New range makes it even easier to have fun on the river:

- Reinforced carry handles on all corners for easy access back onto the board.
- Full EVA deck pad grip to limit loising balance and falling off.
- D-Ring on hull side of nose for portability.
- Bungee tie-down for storing gear.
- Deluxe 2 plus 1 rail torsion band and biaxial stringer reinforces the rails, combining to make a stiff, twist free ride.
- Forward mounted half-moon whitewater quad fins are optimized for tracking and turning, all with minimal drag.
- New US center fin box with PH River fin improves straight line tracking and widens the usage as as an all round cruising option.

# DAN GAVERE

"The different sizes allow riders of any shape or size to experience how fun and easy whitewater sup can be" - Gavere on the new lineup.

## 11'0" X 34" STREAM CROSSOVER

"Dedicated river racing performance"

- 11'0" length is designed for river racing with narrow nose outline for a faster glide.
- Best option for heavier riders up to 115kg wanting extra comfort from the added volume.
- 34" width gives stability while maintaining efficiency and maneuverability to react and respond to the river.

# RACER

Twin Dual Stringers on the deck for maximum stiffness.

Carbon Rails for added rail stiffness.

## RAILEDGE TECHNOLOGY

The innovative Rail Edge helps the water release off the board's tail for optimal glide and speed. The Rail Edge is still folded easily when deflating.

Available on all Racer and Touring Boards.

# TOURING

### FCS INSERT

For mounting a GoPro Camera

### SCOTTY MOUNTS

Attach any after market Scotty accessories. (only on 14'0" Touring and Sportsman)

### BUNGEE TIEDOWN

Easily store gear and supplies.

### NEOPRENE PADDLE HOLDER

carry strap deluxe and zen.

# INFLATABLE DELUXE STIFF AND LIGHT

- Dual Stringer on the deck for increased rigidity.
- Carbon Rails for extra support in the critical standing area.
- 6" linear dropstitch with uni-directional connecting yarns increasing longitudinal stiffness.
- Half Layer PVC laminates reduces the weight significantly.

## MAGIC BAG

- Strong
- Light
- Easy to roll
- Only available with Deluxe models

For full details see page 84

## ADDED FEATURES:

- EVA Carry handle.
- Neoprene paddle holder and carry strap on the tail.
- Integrated tow ring in the valve area and bottom of the nose.
- EVA deck pad for easy grip.
- Supplied with heavy duty Magic bag and Double Action pump.

Recommended to inflate boards between 15-18 PSI for optimum stiffness and performance.

- 2000160001008
- 2000160001009
- 2000160001010

**MULTIPLE HANDLES**

**HIKING STRAPS**  
Ergonomically shaped

**BACK SUPPORT**  
Ergonomically shaped

**STRAP FREE SYSTEM**  
storing excess straps when not carrying the board.

**TOP COVER WITH POCKET (ONLY DELUXE)**

**INSIDE / OUTSIDE COMPRESSION BELT**

**FULL SIDE ZIPPER FOR EASY LOADING**

**BREATHING NET**

**EXCLUSIVE HARD PLASTIC SHELL WITH ROLLER WHEELS**  
holds the board in a freestanding upright position.

### V8 DOUBLE ACTION PUMP PRODUCT CODE 2000000001663

- Inflate your board faster and easier with continuous pumping cycles in both down and upward action.
- With a switch, the double action valve pump can convert to single action for easy inflation up to 15-18psi.
- The ergonomically designed foot base creates a stable, comfortable platform for sustained effort in getting your board up to 18psi, in the shortest amount of time.

### ELECTRIC PUMP PRODUCT CODE TBA

Inflates up to 22Psi.  
Takes approx. 3min to inflate a 170L board to 18Psi.  
Powered by supplied battery or car battery via leads.  
\* Sold separately

### V8 FLOW VALVE SYSTEM

Easy flow action due to the increased diameter of the intake and exhaust valve.

**SINGLE ACTION**

**DOUBLE ACTION**

**NEW**  
**NEW HIGH DENSITY PUMP HOSE**  
20% faster in inflation time.

**REMOVABLE FOOT BASE**

### FCS BOX / DELUXE

Starboard side fin box is streamlined to follow the foil of the fin and will accommodate any FCS side fins.

### UNIVERSAL US CENTER FIN NEW

US center fin box fits all universal center fins. It is fitted on all inflatable boards and is short for easy roll up.

### GLUE ON / ZEN

High rake, low profile side fins provide good tracking and folds easily with the board.  
Soft material and round edges for safety.

# 10'6" X 24" ALL STAR JR.

*"A perfect board for future racers."*

- Specially tested and developed in proportion for the youth to become future world champions.
- Aimed for kids up to 55kg who don't yet have the power to paddle a 12'6" board up to hull speed.
- A light and fast high performance race board dimensioned to get the best speed for kids' strength and to ride in all conditions without being overwhelmed by the power of wind and ocean.

**Bottom shape:** "Single Concave"

- Single concave bottom shape giving lift for light riders to have quick acceleration.

**Race Ultra Light Core fin**

A perfect combination for creating a well balanced behavior in ocean swell and flatwater, with enough rake to go through seaweed.

**MAX RIDER WEIGHT**

55 kg

**DIMENSIONS**

Length:	Width:	Thickness:
10'6"	24"	5.6"
320.0 cm	61.0 cm	14.2 cm

Hybrid Carbon                      2058160301001

# 10'6" X 25" ASTRO JR.

*"The Astro Junior is a great touring/racing board for young enthusiasts."*

- Flat rocker and narrow outline for maximum glide and to hold the paddle closer and straighter to the board for improved tracking.
- Inflatable is the safest option for kids that is easy to store in a backpack and can be inflated in a few minutes.
- Traveling has never been easier for the whole family to pack their boards in the car and go and explore.

**"Most probably the only real kids' board in the market. The Astro Junior Racer is 10'6"x25", a perfect board for 5 to 12 year old kids. The board is incredibly light, so kids can easily carry it alone."** ~German SUP Magazine

10'6"x25"

2050150601001

# 7'4" X 25.5" PRO

*"Best board for kids to rip on in the waves"*

- Best option for lightweight riders to learn to paddleboard in the waves with progression to evolve into high performance surfers.
- ASAP construction has a soft deck to fall on, yet is strong and durable for long use.
- Best suited for beginners up to 35kg, intermediate kids up to 50kg, and for advanced riders 50+kg.

**Bottom shape:** "Concave to double concave"

- Concave gives lift while double concave allows for rail to rail turning.

**MAX RIDER WEIGHT**

50 kg

# BLUE CARBON

*LIGHTEST WEIGHT, QUICKEST RESPONSE, STRONGEST BUILD.*

- Starboard Blue Carbon technology uses 15 kg/m<sup>3</sup> fused, precision-molded Cellcore for light weight and water resistance. A full deck, bottom and rail wrap of high density PVC foam makes the board stronger for impact and hugely increases overall hull strength.
- The ultra-light biaxial and uni-directional Carbon fibers with optimized angles wrap the entire board, introducing flex and reflex patterns in paddle boarding.
- The sensational light weight increases carving ability and acceleration.
- The weight saving further allows you to paddle longer with less energy consumption.

## **IQ HANDLE**

The solid, comfortable ABS inside handle is not part of board construction and does not affect the board construction.

The large size, inside grip, allows for generous hand sizes and the board can be carried with great comfort.

# AST ELECTRIC

**DURABLE, TOUGH AND LIGHT. MOST MODELS ARE WINDSURFABLE.**

- The Advanced Sandwich Technology has a 15 kg/m<sup>3</sup> fused cell core for light weight and increased water resistance.
- A three-dimensional glass laminate is wetted out with high grade expanding epoxy resin, creating a thicker impact resistant outer skin with increased overall hull strength.
- A 500 kg/m<sup>3</sup> veneer of 0.6mm uni-directional Australian Pine forms an outer layer on the deck resulting in extra impact resistance, rigidity and further improved overall hull integrity.
- 300 grams uni-directional glass stringers are laminated flat on the deck and wrapped on fore rails in front of the standing area to support integrity while in surf conditions.
- Extra reinforcements are placed around all inserts, resulting in zero insert damage reports so far.

## IQ HANDLE

The solid, comfortable ABS inside handle is not part of board construction and does not affect the board construction.

The large size, inside grip, allows for generous hand sizes and the board can be carried with great comfort.

# WOOD

**STRONG, LIGHT AND EXCLUSIVE. THE ORIGINAL WOOD TECHNOLOGY SINCE 1994.**

- 15 kg/m<sup>3</sup> fused precision-molded cell core for light weight and increased water resistance.
- A 500 kg/m<sup>3</sup> veneer of 0.6mm biaxial Australian Pine forms an outer layer on the deck resulting in extra impact resistance, rigidity and further improved overall hull integrity.
- A three-dimensional glass laminate is wetted out with high grade expanding epoxy resin. This creates a thicker impact resistant outer skin with increased overall hull strength.
- Glass rail reinforcements for extra stiffness against snapping when nose diving.
- Extra reinforcements are placed around all inserts, resulting in zero insert damage reports.
- Starboard pioneered molded wood technology in 1994 and first introduced it to their Surf and Windsurfing boards.

## IQ HANDLE

The solid, comfortable ABS inside handle is not part of board construction and does not affect the board construction.

The large size, inside grip, allows for generous hand sizes and the board can be carried with great comfort.

# STARSHOT

STARBOARD QUALITY AT AN ATTRACTIVE PRICE.

- 15 kg/m<sup>3</sup> fused precision-molded cell core for light weight and increased water resistance.
- Multiple layers of high grade fiberglass are wetted out in epoxy resin, while a standing area of a 0.6mm uni-directional, Australian Pine wood layer is added for extra deck impact resistance and rigidity. All inserts have added reinforcements.
- 360° glass reinforced rails.
- 3/4 deck pads with crocodile skin texture.
- Board under 10'0" feature tail kick pad.
- Full gloss rails and deck.
- Our boards are all precision molded and the compression during molding ensures an extra hard and strong outer surface.

# INFLATABLE

## INFLATABLE DELUXE STIFF AND LIGHT

- Dual Stringer on the deck for increased rigidity.
- Carbon Rails for extra support in the critical standing area.
- 6" Dropstitch with uni-directional connecting yarns increasing longitudinal stiffness.
- Half Layer PVC laminates reduces the weight significantly.
- Linear dropstitch.

**DUAL STRINGER TECHNOLOGY**

**DECK PAD**  
4mm EVA Square grooved with croc skin texture

**AIRTIGHT INNER RAIL BAND**  
0.5mm

**COMPRESSION RAIL BAND**  
0.5mm

**NOSE AND TAIL RAIL BAND**  
0.7mm

## CARBON

Outer Rail Band for further stiffness and strength

**INNER CORE**

**6" DROPSTITCH**

**OUTER SHELL**

**HALF LAYER PVC LAMINATE**

### ADDED FEATURES:

- EVA Carry handle.
- Neoprene paddle holder and carry strap on the tail.
- Integrated tow ring in the valve area and bottom of the nose.

### FIN BOX:

- Side fins will fit the standard removable Surfinsz or your favorite FCS fins.
- Universal US Center Fin Box to fit all sizes of fins. Short for easy board roll up.
- Supplied with black injected moulded fins.

Recommended to inflate boards between 15-18 PSI for optimum stiffness and performance.

### Available Models:

# INFLATABLE ZEN

## STRONG AND DURABLE

- Strong Double Layer PVC laminates for maximum strength on the deck and bottom.
- Extra thick PVC Outer Rail Band for maximum protection.
- Biaxial dropstitch

A Double PVC Rail Band for maximum strength and durability.

**COMPRESSION RAIL BAND**  
0.5mm

**AIRTIGHT INNER RAIL BAND**  
0.5mm

**EXTRA THICK OUTER RAIL BAND**  
0.9mm

**DECK PAD**  
2mm croc skin

**HEAT RESISTANT GLUE**

Starboard uses a new advanced glue technology with high heat resistance and superior adhesive welding on both Deluxe and Zen.

Zen construction with additional triple PVC Rail Band for extra strength and durability. The best option for clubs and schools.

**INNER CORE**  
4.75"  
DROPSTITCH

**OUTER SHELL**  
DOUBLE SKIN  
PVC LAMINATE

## ADDED FEATURES:

- EVA Carry handle.
- Neoprene paddle holder and carry strap on the tail.
- D-ring on the tail of the deck and bottom of the nose.

### FIN BOX:

Flexible permanent side fins for tracking and safety.

New Universal US Center Fin Box to fit all sizes of fins. Short for easy board roll up. Supplied with black injected moulded fins.

Recommended to inflate boards between 15-18 PSI for optimum stiffness and performance.

### Available Models:

INFLATABLE

# ASTRO RACER

Twin Dual Stringers on the deck for maximum stiffness.

Carbon Rails for added rail stiffness.

## RAILEDGE TECHNOLOGY

The innovative Rail Edge helps the water release off the board's tail for optimal glide and speed. The Rail Edge is still folded easily when deflating.

Available on all Racer and Touring Boards.

# ASTRO TOURING

## FCS INSERT

for installing lights, GPS and other accessories.

## SCOTTY MOUNTS

Attach any after market Scotty accessories.  
(only on 14'0" Touring and Sportsman)

## BUNGEE TIEDOWN

Easily store gear and supplies.

# ASAP WITH STARSHOT BODY

**AS STRONG AS POSSIBLE. SOFT RAIL AND HARD BOTTOM.**

- Impact-resistant high density thermoformed EVA foam 360° around on the rails.
- 20 kg/m<sup>3</sup> fused, precision-molded Cellcore for extra strength and water resistance.
- Full deck EVA pad with 4mm grooved traction on rear two-thirds of the board.
- Multiple layers of high grade fiberglass are wetted out in epoxy resin. A standing area of a 0.6mm Australian Pine wood layer is added for extra deck impact resistance and rigidity. All inserts have added reinforcement.
- ASAP constructed boards are based on previous year's shape designs.

## MAGIC BAG

The Astro Magic Bag is truly functional, accessible and comfortable to take on every adventure, anywhere in the world.

### EXCLUSIVE HARD PLASTIC SHELL WITH ROLLER WHEELS:

Built using a strong high-density plastic core, the new Astro Compact Shell securely holds the board in a freestanding upright position, making it easy and quick to pack and comfortable to transport as the board is locked into position.

### STRAP FREE SYSTEM

The new Strap Free System allows you to carefully hide and store any excess straps when not carrying the board, perfect for storing the board and checking in baggage at the airport without fear of straps getting caught and damaged.

### HIKING STRAP DESIGN

Ergonomic shaped shoulder straps and waist belt make this bag comfortable to carry on any adventure, evenly distributing the weight of the board to reserve energy.

### MULTIPLE HANDLE MOUNTS

Multiple handles are fitted on the bag to make it easy and quick to carry the bag.

### EXTRA FEATURES

- Outside compression belt to keep bag compact
- Inside strap to hold the board in position
- Breathing Net to prevent build up of odors.
- Inside fin pocket storage
- Top Cover with Pocket (Only on Deluxe)
- Name Card Holder
- Full Plastic Non-Corrosive Zippers
- Durable 600x1000D Fabric
- Multiple handle mounts
- Full Side Zipper for easy loading.

Medium: Board sizes up to 32" wide, all lengths. Total Bag height from floor 36" or 91cm  
 Large: From 33" up to 40" wide, all lengths. Total Bag height from floor 44" or 112cm

**STRAP FREE SYSTEM**

**BEACH FLAG 80 x 440 cm** **NEW**

New for 2016, the beach flag comes with either a cross-stand for indoor display, or with the standard metal stake for outdoor use.

It is also available as a complete set, delivered with both the cross-stand and metal stake for more versatility.

Further strength improvements have been made, including a stronger pole with better finish and a round-ball at the tip to prevent tearing the luff tube. Reinforcement stitches have also been added to the tip of the flag to make sure the new 2016 Beach Flag stands tall over time.

# LIGHT CORE

Light Core composite fins are designed to maintain the flex characteristics of a fiberglass fin, whilst reducing the weight, but also maintaining strength. Available on Wood and Blue Carbon as a center fin and side fins. On AST Electric and Astro Racer, center fin only.

## CENTER FINS

## SIDE FINS

# INJECTION MOLDED

Nylon with 30% fiber content, defined edges, and extra stiffness for performance. Available on AST Electric as side fins. Used for all fins in Starshot, ASAP and Astro models.

## CENTER FINS

## SIDE FINS

# FIN DEVELOPMENT

Surfinz boxes allows for a degree of forward/aft movement to experiment with fin positioning. They are FCS compatible. They are available as side fin boxes in all our boards other than the Pro models.

**Critical factors are:**

- Base width providing drive for acceleration.
- Depth giving grip and hold.
- Sweep supporting pivoting.
- Foil creates speed and drive.

These culminate to provide the ultimate blend of a fin's characteristics suited to each particular board. Different boards require different fin configurations, whether it be quad or tri (sometimes both) as well as with various sizes (lengths and widths). The best combination has been tested for each of the boards throughout the range.

The Light Core composite fins are designed to maintain the flex characteristics of a fiberglass fin, whilst reducing the weight, also maintaining strength. It has been found that an optimum response/flex for SUP's of shorter length and larger waves are the stiffer Light Core fins for instant response.

The injection-molded (PA+GF 30%) fins provide the added flex found suitable for larger boards and smaller surf for a smoother sensation through the arc of a cutback.

## FCS II BOX

**LATEST IN DETACHABLE FIN SYSTEM TECHNOLOGY AND PERFORMANCE.**

\* Only available in PRO models as side fin boxes. Delivered with Starboard Light Core fins sporting standard FCS base.

- 1. Keyless** Efficient keyless system for quick fin installation and release.
- 2. Flush Leading Edge** Recessed leading edge with flush base connection improves water flow.
- 3. Backward Compatible** The FCS II System is backwards compatible with all your favourite FCS dual tab Fins.
- 4. The Mechanism** Constructed using a corrosion resistant titanium tension rod, and a rotating, wear-resistant polymer barrel.
- 5. Honeycomb Construction** Lightweight Composite Frame encapsulated by high density foam reduces weight and maintains flex.

## FIN SET UP

Most boards available with 1-5 Fin slots

**SINGLE**

Single fin provide the holding power to keep the tail of the board from sliding around.

**THRUSTER**

Offers riders a combination of stability and drive. Thrusters blend the maneuverability of twin fins with the hold of single fins to create a new type of performance.

**QUAD**

Increased speed, strong hold in hollow waves and high maneuverability.
